PACKAGING

ELEON Integrated Power supplies are delivered as fully assembled packages to be plugged into your products. With ELEON's modular components, packages can be customized to meet special requirements or can be built as drop-in replacements for traditional batteries.

CUSTOM PACKAGING

Whether you need rugged, robust packaging for high-impact applications, or a slim, compact design for your low-profile product, ELEON can build a solution that fits.

APPLICATION

ELEON power can be configured as a drop-in replacement to fit existing designs, giving your product the edge in a competitive market. Or, integrate ELEON's leading edge technology to provide Power for the Life of your Product. Any application that can benefit from extended battery life can benefit from ELEON.

ABOUT ELEON™

ELEON builds energy system solutions to cost-effectively provide *Power for the Life of your Product*. Much smaller than micro-fuel cells, our power supplies are combined with storage, generation, and charge control devices to meet specific power requirements for wireless network, consumer, and life safety products.
